

Description

The L-RETRO-C LED carriage kit offers service professionals an economic, easy to install solution to safely upgrade HID luminaires to LED. Available in three output versions, the L-RETRO-C Retrofit Kit proves to be the perfect LED conversion solution for your next carriage project.

Technical Specifications

Input Voltage: 120-277V or 347-480V

Kit Contents: The kit consists of an aluminum panel with integrated LED circuit board, LED driver, 20kA surge suppressor, and all wiring and hardware required for installation. Installation of the kit to the existing fixture is accomplished via provided mounting screws.

Power Supply: A single wide range (120V to 277V) 96 Watt, regulated DC power supply is included. The power supply is compliant with UL 1012 and 1310. The drive current provided to the LEDs is 70 or 105mA.

The power supply performance meets the following electrical characteristics: THD: Less than 20%. PF: Greater than 0.90 @ 120V. Max Power: 96 Watts or less.

Color Temperature: 2700K, 3000K, 4000K (standard), 5000K.

LED Lifetime: All LED's are rated for a minimum of 100,000 hours of continuous operation at ambient temperatures from -40°F/-40°C to 120°F/50°C.

Light Engine: Each light engine consists of a total of 72 Nichia LEDs. The LED board is mounted to a 0.125" thick aluminum disk that is customer fit to the existing fixture.

Color Rendering Index (CRI): Minimum of 70 or higher.

Dimming: 0-10V standard dimming capability.

Surge Protection: Thermally protected 20kA/ 40kV varistor type surge suppressor is included and meets ANSI C136.2-2015: Extreme Level. Also meets IEC61643-11 Class II / EN61643-11 Type 2, and US Dept of Energy MSSLC Model Spec for surge protection. The device is wired in series with the luminaire input power in order to interrupt power to the luminaire when consumed, protecting the LED power supply and circuit boards from additional electrical surges.

Lumecon ETD™ System: The enhanced thermal dissipation system engines are thermally bonded to provide maximum thermal dissipation to the exterior of the fixture to ensure long life. To protect the light engine panel from moisture and corrosion, the LED light engine panel is uniformly coated with a UV stabilized acrylic polymer resin that meets MIL and ASTM dielectric standards, UL, and IPC standards for flammability, moisture resistance and thermal shock.

Manufacturing Origin: US Manufactured and Assembled.

Buy American: Meets Buy American requirements within the ARRA.

Warranty: 10 Year L70 performance based warranty. For full warranty terms, please visit our website: www.lumecon.com

Ordering Information

L - RETRO - C Options / Ordering Example: L-RETRO-C-20-40-1

Wattage	Color Temperature	Voltage
20 - 20 Watts	27 - 2700K	1 - 120v-277v
30 - 30 Watts	30 - 3000K	2 - 347v-480v
45 - 45 Watts	40 - 4000K	
60 - 60 Watts	50 - 5000K
